SUMMARY

My role as Lead Technical Facilitator involved upskilling graduates with Software/ Web Developer coding skills. I conducted periodic code reviews for the Learnership programs within the organization to assist in building projects, using modern frontend and backend technologies. I was also directly involved in the organization's recruitment process for Software Development roles. I have developed websites and applications in collaborative, remote setup and produced quality work while working solo. I possess strong soft skills that benefit teams because I enjoy imparting knowledge and learning from others. I have equipped 1000+ women and girls with basic to intermediate programming skills as an initiative to bridge the gender gap in the industry through volunteering and working for GirlCode.
